Member Countries of ANRPC
Cambodia, China, India, Indonesia, Malaysia, Papua New Guinea
Philippines, Singapore, Sri Lanka, Thailand, Vietnam
Foreword

The past two decades had seen fundamental changes in development policies pursued by natural rubber producing countries. An important dimension of the policy shifts is the emergence of the private sector in a big way in carrying out the development activities hitherto undertaken directly by government sector. Whereas government organizations have confined their position to a facilitator’s role, organizations in the private sector gained dominance. New development initiatives such as *private-public partnerships programmes and participatory group approaches* have come up in varying forms. In their attempts for gaining competitive advantage in cost and volume game, private commercial organizations and corporate bodies have extensively adopted strategic alliance, mergers and acquisitions cutting across countries and regions.

This process has been manifested in the rubber industry as well. Private sector organizations have strengthened their position and widened their range of activities in R&D, extension, processing, manufacturing and marketing in rubber and rubber products.

Although ANRPC is an inter-governmental body, the Association has recognized the need for encouraging collaborations and joint ventures between rubber-related organizations, both in the public and the private sector across counties. As an initial step in this direction, the ANRPC Executive Committee in its 28th meeting, held in Papua New Guinea in October 2004, had identified the need for having a Directory of all rubber organizations in ANRPC member countries.

The publication of this Directory of Rubber Organizations in ANRPC Member Countries 2011 is based on official information reported by Cambodia, China, India, Indonesia, Malaysia, Singapore, Sri Lanka, Thailand and Vietnam. The Directory covers only those organizations which were reported by the respective member countries to the ANRPC Secretariat. Users are encouraged to point out errors and omissions in this pioneering attempt of the ANRPC Secretariat.

Before I conclude, I would like to acknowledge the cordial cooperation and support received from ANRPC member countries and the Executive Committee in bringing out the Directory.

Dato' Dr. Kamarul Baharain bin Basir
Secretary-General
ANRPC
Rubber Organizations in Vietnam
(Covers only those reported to the ANRPC Secretariat by the Government)

For the continuous improvement of the productivity of rubber plantations, various research projects have been launched in breeding and selection of high-yielding latex and latex-timber clones, planting recommendations for various rubber-growing regions, and shortening immaturity period through soil classification, appropriate nutrition and water management as well as advanced planting materials and control of weed and disease.

Other project for the continuous enhancement of sustainability of rubber plantation bring about appropriate farming system in the immature period for smallholders, low intensive tapping systems and stimulation, latex diagnosis, nutrition diagnosis and disease management in the mature period. Activities in the post-harvest sector include improving processing technologies for diversified rubber types and grades, appropriate processing technologies for smallholdings, improving quality of Vietnam NR, effluent treatment and development of rubber-based products
